DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to a microscope with specimen support, classified in class 359, subclass 368.
- II. Claims 13-27, drawn to a method of operating a microscope including calibration thereof based upon evaluation of reference data, classified in class 359, subclass 368.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product, i.e. microscope with reference specimen support, can be used for comparison of a specimen under examination and the reference specimen.

Art Unit: 2872

3. These inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter. Further, the searches for each group are not coextensive, with group II requiring a search in 359/900 not required for group I. Therefore, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication should be directed to Mark Robinson at telephone number (703) 305-3506.
